

## Cyber

## WE PIONEER CYBER SECURITY IN DEFENCE AND AEROSPACE

- With **450+** highly qualified cyber professionals in France, Germany, UK and Spain **we are a European specialist in cyber security**
- We help our governmental, defence and institutional customers to **design, develop, integrate and deploy tailored cyber solutions**
- As a fully integrated business of the **Defence and Space** division, we **help boost cyber resilience** in the most **demanding environments**

## What we do

## A strategic partner for cyber capabilities

As the aerospace and defence industries continue to grow in scale, digitalisation and interconnectivity, platforms and systems become increasingly susceptible to cyber-attacks. Having protected Airbus Defence and Space's complex systems and networks for over 30 years, we are leveraging our Airbus DNA to develop products and solutions for customers facing similar challenges as us, based on state-of-the-art trusted technologies.

Our portfolio encompasses broad expertise in cyber project management, including Crypto and Key Management systems, Security Gateways, Network and Endpoint Protection, Aerospace Multi Messaging Systems, Detection and Response Chain and Cyber Attack Simulation Platforms.

Multi-Domain  
Cyber Capabilities

**Our Portfolio: We design, develop, integrate and deploy tailored cyber security products and solutions for defence, governmental and institutional customers**

## Operational support

Life System Support (LSS) • Maintenance, Repair and Operations (MRO) • Ensuring permanent safety and operational conditions

## Training

Theoretical cyber education, operational training and exercise • **CyberRange**: Advanced training capacities and cyber operational readiness • **OT Cyber Security**: Persistent cyber resilience for SCADA assets

## Design, develop, integrate and deploy secure solutions

**Security by Design**: Building secure systems by mitigating cyber risks throughout the entire lifecycle

**Platform Security**: Reliable and high-grade aerospace security expertise

**High-Grade Encryption**: Cryptographic network security

**Key Management**: Generate, manage and distribute cryptographic keys

**Defence & Tactical SOC**: SOC solutions with monitoring capabilities for advanced cyber defence, even as mobile assets

**Secure Exchange Gateways**: Multi-Level exchange gateways for secure information transfer, also embedded

## In a Nutshell

**European specialist** in cyber security for defence and aerospace systems

**End-to-end integrator** for cyber security

**Trusted partner** for governments, institutions, armed forces and Airbus

**Unique experience with platform security** and embedded systems

## AIRBUS
